

## Test Automation Simplified

**Spritz** is Cognizant's script-less test automation platform that provides a unified interface for all the "day-to-day" test automation activities such as test design, test development, test execution, reporting and maintenance.

### Unified Script-less Test Automation Platform

Offers Web/Mobile Browser, Web Services, BDD, Responsive Web Design and Look and Feel testing capability.

### Think Beyond UI

In-Spritz Automation with wireframes, Exploratory Testing, DevOps Ready, Web Page Performance Metrics.

### Faster ROI

60%\* faster ROI realized compared to traditional automation with Selenium.

### Rapid Test Development

User friendly IDE with smart recorder, Object Spy and drag-drop features.

### Ease Of Maintenance

Leverage Object Heal to handle object related changes with ease

### Flatter Learning Curve

Script-less approach and user friendly features enables flatter learning curve as compared to traditional tools.

## CASE IN POINT

An American Retailer for Home Improvement was looking to support automation using Agile methodology across browsers as they were using a highly Agile web application.

Spritz enabled automation of **355 Tests** out of the total of **425 test cases** thus providing a high automation coverage of **83%**.

# 35%

Reduction in Test Design efforts

# 15%

Savings in test execution effort

### Fast-Track DevOps Adoption With

Cognizant

**OneDevOps™**

Integrated. Flexible. Inclusive.
